

Somfy Expert Website Information

As part of the requirements of joining the Somfy Expert program, your business agreed to provide information on Somfy on your website, with a link back to the Somfy website. The below document provides you with the information you need to complete these requirements.

Should you require any assistance, please do not hesitate to contact your Somfy Regional Sales Manager or the Somfy Marketing Team.

Linking Back to Somfy from Your Website

It is more relevant for the visitors to your website to be landed on a specific page within the Somfy website that deals with your products or something specific that would be of benefit to them, such as videos or product information, rather than simply the home page. This will make it clearer for the visitors and be of more benefit to them. It will also assist with Search Engine Optimisation for your business and for Somfy.

This means you will need to:

- Visit the Somfy website, www.somfy.com.au
- Choose which page you would like to link back to (remember, not the home page)
- Create the link from your website

Information on Your Website

Somfy has provided a general overview of our business and the products we supply. It will be beneficial for you to adapt this information to your business – only place the product information that is applicable to your business and adapt to your website and your business.

By adapting this information to suit your business it will assist with Search Engine Optimisation for your business and for Somfy.

This means you will need to:

- Read over the below company and product information
- Select the applications applicable to your business
- Personalise the information to suit your business
- Upload the information onto your website
- Advise Somfy if you would like to use any product or lifestyle images – send all requests for images to mary.maidiotis@somfy.com

General Introduction to Somfy

Somfy automation has been designed to offer greater flexibility and convenience for you and your home. Imagine going to bed at night with blinds drawn for full privacy and waking up to rays of sunshine illuminating your living space, all preset to occur without you having to do a thing!

Experience uninterrupted style, entertaining and moments with an automated home from Somfy. Enhance your lifestyle with blinds, curtains and awnings all under your control at the touch of a button.

Benefits of Motorising Internal Window Coverings

The environment we create within our homes and offices contributes significantly to health and wellbeing in our daily lives. Somfy automation systems enhance our living environments and wellbeing by adding convenience, safety, thermal comfort and energy efficiency.

By choosing Somfy automated window coverings, you maximise the functionality of your product and gain a much-desired flexibility that is simply not possible with a manual system.

The benefits of Somfy automated blinds and curtains include:

1. Convenience

With the simple touch of a button you can move your blind or curtain to whatever position you like. You can also add sensors and timers, so your products work for you even when you're not at home.

The home automation solution, Connexoon Window RTS, allows you to control your window coverings from your mobile device, no matter where you are in the world. Connexoon Window RTS is also compatible with IFTTT, allowing for voice control via third-party devices including Amazon Echo and Google Nest.

2. Energy Efficiency

Reduce your energy usage by controlling the amount of heat and light entering your home. Keep your home cool in summer by reflecting the harsh heat of the sun but allow the sun in during winter to enjoy natural warmth and light.

3. Longer Lifespan

Manual operation can damage blinds and curtains through excessive force or improper use. Somfy's smooth and controlled operation of blinds and curtains ensures both maximum functionality and a longer lifespan of the product.

4. Safety

Loose cords and chains are a danger to young children. With Somfy automated blinds and curtains, the cords and chains are completely removed, providing peace of mind for you and a safer environment for your children.

Protecting your home while you're away is even easier with Somfy automation, allowing you to control your window coverings wherever you are in the world, or pre-program scenarios to simulate presence in your home and deter intruders.

5. Quiet and Discreet

Somfy's world leading motors are fully concealed inside the tube of the blind. With the simple press of the remote control you will enjoy the ambience and impress your guests with a quiet and sophisticated automated system. In particular, Somfy's *Sonesse* range of motors is especially designed for silence.

Internal Products

Sonesse – ultra quiet motors

Somfy offers world leading performance with the range of Sonesse ultra quiet motors. Sonesse motors use patented technology to dampen noise and vibration to deliver a new standard in acoustic control. The Sonesse range is available in both wired technology, RTS radio technology motors and WireFree motors.

Curtain motorisation

Somfy's Glydea ULTRA curtain motor system is quiet, discreet, flexible and robust to deliver the highest quality in automated curtains for any location. Designed with an adaptable operating system to suit the environment, you can choose to control your curtains via dry-contact, radio RTS technology or RS485 modules. Plus, the 'Touch Motion' feature will open or close the curtain simply by pulling on the fabric.

Alternatively, Somfy's Irismo 45 WireFree RTS motors provides you with all the benefits of curtain motorisation, without the need for domestic wiring, thanks to a removable, rechargeable battery.

Somfy's WireFree Range

Offering the benefits of remote control operation without the need for electrical connection, Somfy's battery powered motors are the ideal solution for hard to reach blinds, when electrical connection is difficult or simply as your introduction to motorisation.

Benefits of Motorising External Products

The sun protection provided by awnings, roller shutters and external blinds is a key factor for health and wellbeing in our daily lives. Somfy motor and control systems enhance our wellbeing by adding convenience, thermal comfort and environmental efficiency.

By choosing a Somfy automated awning, roller shutters or external blind you maximise the functionality of your product and gain a much-desired flexibility that is simply not possible with a manual system.

The benefits of Somfy automated awnings, roller shutters and external blinds include:

1. Convenience

With the simple touch of a button you can move your awning, roller shutter or external blind to whatever position you like. You can also add sensors and timers, so your products work for you even when you're not at home.

The home automation solution, Connexoon Window RTS, allows you to control your window coverings from your mobile device, no matter where you are in the world. Connexoon Window RTS is also compatible with IFTTT, allowing for voice control via third-party devices including Amazon Echo and Google Nest.

2. Energy Efficiency

Reduce your energy usage by controlling the amount of heat and light entering your home. The major benefit of external products is that they stop block UV rays or cold before it reaches your window, therefore preventing it from entering your home.

3. Longer Lifespan

Somfy's smooth and controlled operation of awnings, roller shutters and external blinds ensures both maximum functionality and a longer lifespan of the product. Manual operation can damage blinds and awnings through excessive force or improper use.

Somfy's Maestria 50 RTS motor is designed for all types of external screens and features smart obstacle detection, which will automatically retract your screen when it detects an obstacle, preventing damage to your screen.

4. Safety

Loose cords and chains are a danger to young children. With Somfy automated awnings, roller shutters and external blinds, the cords and chains are completely removed, providing peace of mind for you and a safer environment for your children.

Protecting your home while you're away is even easier with Somfy automation, allowing you to control your window coverings wherever you are in the world, or pre-program scenarios to simulate presence in your home and deter intruders.

5. Quiet and Discreet

Somfy world leading motors are fully concealed within the awning or sunscreen. With the simple press of the remote control or Connexoon Window RTS app on your smartphone, you will enjoy the ambience and impress your guests with a quiet and sophisticated automated sun protection system.

Controls and Sensors Overview

As a world leader in automation systems, Somfy offers a range of control solutions to meet any requirement in the automation of window furnishings in the home or office. Somfy's unique and stylish range of remote controls provides users with the ultimate in convenience – all at the touch of a button.

In conjunction with the broad range of Somfy sensors, you can create energy efficient, convenient environments to improve the well-being of occupants in all living spaces.

Connexoon Window RTS

Control your blinds, curtains, awnings, screens, roller shutters and RTS enabled lighting right from your smartphone, even when you're away from home.

Allows control of up to 30 products or 30 groups of products, with the ability to set products on a timer and create up to 4 scenarios!

Voice Control

Enjoy the complete smart home experience thanks to IFTTT compatibility with Connexoon Window RTS. Our home automation solution allows you to operate your window coverings using simple voice commands to your Amazon Echo or Google Nest device.

Situo RTS (1, 2 or 5 channel)

Allows control of one motor or a group of motors per channel.

Unique design available in a stylish range of colours including pure, silver, gold and rose gold.

Situo Soliris RTS (1 or 5 channel)

Turn your sun sensor on and off with the touch of a button.

Available in pure.

Situo Variation RTS (1 or 5 channel)

Revolutionary scroll wheel functionality – specific for Venetian blinds – for precise adjustment of horizontal blind slats.

Available in a choice of colours including pure and silver.

Situo Variation Soliris RTS (1 channel)

Turn your sun sensor on and off with the touch of a button plus precise adjustment of horizontal blind slats.

Available in pure.

Telis 16 RTS (16 channel)

Unique display screen allows for easy operation of up to 16 individual motors or 16 groups of motors.

Create and control multiple zones within the home to suit any lifestyle. Compatible with entire range of RTS products.

Available in a choice of colours including pure and silver.

Telis 6 Chronis RTS (6 channel)

Allows programming of up to 6 timed events per day, plus the benefits of a 6 channel Somfy remote.

Compatible with entire range of RTS products.

Available in a choice of colours including pure and silver.

Smoove RTS wall mounted control (1 channel)

Wall mounted, single channel control unit, up/down and stop functions or open/close and stop function.

Available in a choice of modules and frames: modules available in 3 finishes and framed available in 7 finishes.

Eolis 3D Wirefree RTS motion sensor

100% wireless wind sensor for external folding arm awnings. Automatically retracts a folding arm awning based on wind vibrations. Will also raise external screens in windy conditions to prevent fabric from tearing.

Available in white, black and beige.

Soliris Eolis sensor

Automatically controls your RTS motorised products based on current weather conditions. Energy consumption is reduced by up to 40%, automatically protecting your awning or exterior screen when the sun is detected, or the sun's intensity increases.

Sunis Wirefree RTS sun sensor

100% wireless sun sensor for awnings, screens, external venetian blinds and roller shutters. Automatically lowers your blinds or retracts your awning based on a preset amount of sunlight.

Soliris RTS sun and wind sensor

Automatically adjusts the position of a sunscreen or awning based on wind speed and/or a preset amount of sunlight.

Sunis Indoor RTS wirefree sensor

Allows you to benefit from comfort and energy savings, protecting the inside of your house from harmful UV rays. Automatically adjusts the position of an external blind or roller shutter based on a preset amount of sunlight.

Thermosunis RTS wirefree sensor

100% wireless indoor sun and temperature sensor. Automatically adjusts the position of an internal blind, roller shutter or venetian based on a preset amount of sunlight and inside temperature.

Ondeis Rain sensor

Automatically retracts an awning or closes a roof in the event of rain
